

TRANSITION

TO THE NEW VERSION OF STANDARDS

ISO 9001:2015 & 14001:2015

AN ESSENTIAL PROCESS

**THE NEW VERSION OF THESE STANDARDS
PROMISES TANGIBLE BENEFITS
FOR YOUR COMPANY:**

**ISO
9001
:2015**

&

**ISO
14001
:2015**

/ The risk analysis process within the management system allows governance and **performance** improvement tools to be implemented.

/ The common structure (and the future ISO 45000) will allow future management systems **to be integrated** faster.

/ The structure, which is aligned with the organisation's strategy, boosts the involvement of your company's **management** team.

/ As the new version is less prescriptive, the certification process **is simplified** and demands fewer resources, particularly in terms of documentation.

**YOUR CERTIFICATE
MUST BE RENEWED**

BEFORE SEPTEMBER 15TH 2018

**WHY IS IT ESSENTIAL
THAT THE TRANSITION
PROCESS BEGINS NOW?**

**ENJOY SUCCESS TOMORROW
BY LAYING THE FOUNDATIONS TODAY**

FORWARD PLANNING

lets you schedule the date of the audit at your own pace, prepare the necessary information and immediately implement tools that help to improve quality.

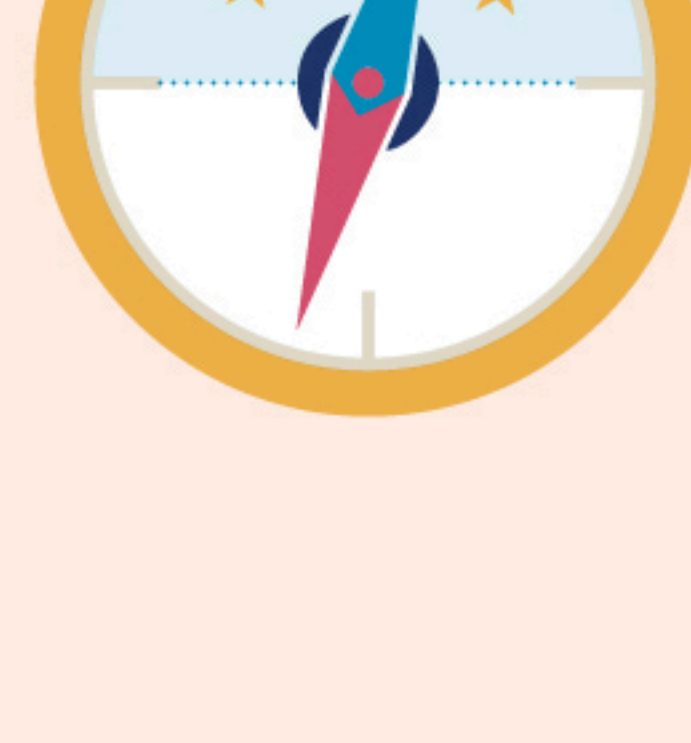

IF YOU FAIL TO PREPARE,

you run the risk of not having enough time to prepare your documents and carry out any necessary audits. You could, therefore, lose your certificate.

**AVOID RISK
AND SEIZE OPPORTUNITIES**

**BEGINNING THE
TRANSITION PROCESS**

means avoiding risk and seizing opportunities that facilitate change.

WAITING

means running the risk of finding yourself up against competitors who have taken the lead and can stand out by obtaining new standards.

**USE THE TRANSITION PROCESS
TO RALLY YOUR EMPLOYEES**

**BEGINNING THE
TRANSITION PROCESS**

lets your employees acquire new skills in order to be more efficient and committed, which helps to develop a quality culture.

WAITING

can diminish the commitment of your employees and reduce quality, operational performance and competitiveness over the medium term.

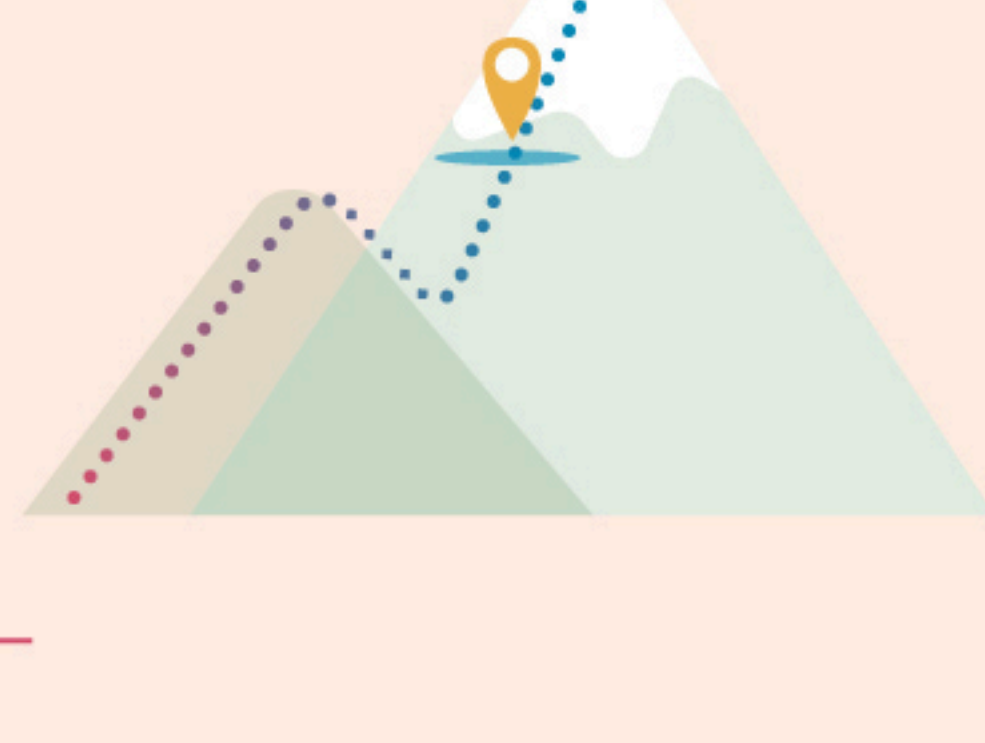

**IMPROVE THE FINANCIAL
PERFORMANCE OF YOUR COMPANY**

**BEGINNING THE
TRANSITION PROCESS**

lets you assess your company's performance and make better decisions, while also implementing a continuous improvement process and boosting your firm's credibility and image.

WAITING

means running the risk of being seen by customers as a company that lags behind its competitors, which will have moved to the new version before you. It is therefore tantamount to giving up on implementing a sustainable development process.
